SUMMARY

Full Stack web developer with experience in creating MERN/.NET applications. Leveraging a background in retail tech sales and construction to create intuitive and practical applications to clients. Described by colleagues as positive, collaborative, and detail oriented.

TECHNICAL SKILLS

Languages: Javascript, C#, Typescript

Technologies: AWS EC2, React.js, Redux, Handlebars.js, GraphQL, MYSQL, MongoDB, Mongoose, Sequelize, Node.js, Express.js, Bootstrap, Material UI, Entity Framework

PROJECTS

OhBet | <https://github.com/Luis-Ramirez21x/Oh-Bet> | <http://44.202.0.40/>

- This betting app allows users to place bets with each other with their own bet-prize and bet-terms. Bet wins and losses are logged allowing for a fun and competitive environment between users. Demo on github link above
- Technologies used: AWS EC2, React 18.2.0, Node 16.17.0, Express 4.18.1, MongoDB, Mongoose 6.5.0, JWTs, REST Api, Bcrypt

Pokedex | <https://github.com/Luis-Ramirez21x/PokeDex> | <https://pokdex-test.herokuapp.com/pokemonList>

- App that uses the PokeApi to display pokemon and their respective stats/characteristics. This app allows you to create an account and save pokemon to your list for later viewing.
- Setup and authenticating user logins/registrations using .net framework
- CRUD request for user accounts and saving/removing pokemon
- Integrate react-bootstrap to front-end
- Technologies Used: Entity Framework 6.0.5, React 18.1.0, PostgreSQL 6.0.5, Bootstrap 5.1.3

Business-Connect | <https://github.com/Luis-Ramirez21x/Business-Connect> | <https://business-connect-app.herokuapp.com/>

- This app allows consumers and business owners to connect with one another. Business owners create a page to showcase their business and consumers are able to search for those businesses.
- Incorporate CRUD operations using TypeDefs and Resolvers/Queries and Mutations
- User authentication using JWTs
- Working with a team of 4 in an AGILE environment
- Technologies Used: React 16.3.1, Mongoose 5.9.10, GraphQL 15.5.1, Apollo Server Express 2.15.0, Bootstrap 4.4.1

Employee-Task-Manager | <https://github.com/Luis-Ramirez21x/Employee-Task-Manager>
<https://obscure-savannah-57648.herokuapp.com/>

- App designed to allow a central “manager” to create “employee” accounts and assign tasks to individual employees. Made to boost the efficiency of deliberating tasks
- Use an MVC framework to provide a layer of abstraction
- Use Bcrypt to ensure user login is secure
- Deploy app to Heroku and hosting on MongoDB Atlas
- Technologies Used: MySQL 2.3.3, Sequelize 6.11.0, Node.js, Express 4.17.1, Materialize, Handlebars.js

EXPERIENCE

Sales Lead 2020-Present
Best Buy Duluth, GA

- I work with clients to quickly identify a problem they have and offer a solution in the form of consumer technologies or services.
- Troubleshooting those technologies such as a cellphone or computer is a regular task.
- Diagnose tech and troubleshoot any problems on both hardware and software
- Key Accomplishments:
 - 2022, Q2 Store MVP out of a possible 60 employees
 - Work extra hours to reach 70K in monthly revenue consistently

Sub-Contractor 2018-2019
Turn Key Oklahoma City, OKC

- Led a team of 5 laborers through multiple construction projects.
- Coordinated with contractors, warehouse managers, and company owners to meet deadlines and accommodate resident's schedules.
- Built good relationships with housing administration to resolve any issues with work conducted

Store Manager 2017-2018
Metro PCS Lawrenceville, GA

- Was responsible for all aspects of retail including hiring, training, marketing, loss prevention, P&L and team leadership.
- Identifying lagging areas in terms of team performance and addressing those areas with improved coaching to staff.
- Creating a fun and welcoming work environment so as to promote employee growth and retention.

EDUCATION

Full Stack Flex Web Development Certification: 2021-2022
Georgia Institute Of Technology Atlanta, GA
